

Eurofins Agrosience Services Ecotox GmbH is part of the Eurofins Agrosience Services global network, providing laboratory, field and processing studies along with eco-toxicological and analytical testing to support the screening, development and registration of test substances in Europe, US and beyond. The company offers all ecotoxicological studies required for the registration of agrochemicals, chemicals, biocides and veterinary/human medicinal products globally. This includes standard terrestrial and aquatic organisms' laboratory studies as well as higher tier semi-field and field testing.

In our Ecotoxicology Laboratory we have an immediate opening for a:

Team Leader / Study Director Aquatic Ecotoxicology (Fulltime) (EC/16/02-13)

Responsibilities:

You will be leading the aquatic plant testing team at our site in Niefern-Öschelbronn, Germany. This will include growth inhibition tests with algae and lemna as well as aquatic macrophytes. Your challenge will be to manage a small team, act as Study Director for the key studies as well as establish new test systems according to the relevant OECD and/or US EPA guidelines. You will be responsible to supervise but also to perform GLP aquatic plant studies. This includes the elaboration of the study plans in collaboration with the clients, perform/supervise the laboratory work, evaluate the results and write the reports. We expect you to keep and further expand our leading laboratory. Networking with the scientific community as well as participation and presentations (oral/poster) at scientific meetings and/or ring-test groups is part of the job description. Moreover, you will be involved in marketing & sales activities with clients.

Ideally you have the following skills:

- PhD in Biology/Environmental Science with focus on ecotoxicology
- Several years of professional experience in aquatic ecotoxicology preferably in the field of aquatic plant testing
- Technical knowhow
- CRO and/or industry experience as well as GLP experience is an advantage
- Operational excellence with well-structured working style
- Team spirit and interpersonal skills are a prerequisite
- Able to work independently and under pressure
- Demonstrate motivation, initiative and pro-activity
- Fluent in English
- Very good computer and statistical skills

We would be pleased to receive your application including letter of application, CV, certificate copies, letter of references and salary expectation
