

The power of connected minds

Internship Bioaccumulation In vitro (m/f/d)

We are the world's leading chemical company because we offer intelligent solutions for our customers and for a sustainable future. We connect and develop people with diverse talents all over the world. For you, this means a variety of ways to advance. Not only your performance but also your personality matter to us, without regard to gender, age, origin, sexual orientation, disability or belief. At BASF, careers develop from opportunities.

Ludwigshafen is the world's largest integrated chemical complex and home to BASF Group headquarters. Located in the heart of Europe's Rhine-Neckar metropolitan region, you will find this to be an attractive place for both work and leisure time.

What you can expect

As an intern within our unit Experimental Ecology, you will actively support a project aimed at developing In vitro methods of estimating bioaccumulation in fish for a period of at least four to six months.

- o Within your internship, you will plan experiments in coordination with the project management.
- o You will also perform the experiments and analyze as well as interpret the collected data.
- o Moreover, you will present your results to other researchers from the research unit.

What we expect

- o You are currently studying physical and/or life sciences with excellent grades and have already worked with In vitro systems.
- o Additionally, you enjoy working in the lab and are interested in experimental ecology as well as bioaccumulation.
- o Moreover, you work proficiently with the standard IT tools.
- o You are impressive for your proactive, confident communication style in English as well as German both as part of a team and when working independently.

We offer

From day one you will be part of the BASF family. You will get involved in challenging fields of activity and have the opportunity to work on exciting projects in an interdisciplinary environment. Depending on the location of the respective group company you will get to know BASF and participate in various workshops and guided tours. In this way you will make numerous interesting experiences and get a deep insight into the world's leading chemical company.
