

tier3 solutions GmbH is an independent and privately owned GLP-certified contract research organization (CRO). We design and conduct high quality and tailor-made field studies in all countries and registration zones in Europe.

We are specifically proud of our multicultural workplace where scientists from a diverse set of backgrounds, experiences and nationalities come together. New challenges require new ideas and innovations. With an exceptional team spirit we strive to find the best solutions for environmental testing of chemicals under field conditions.

If you like to be part of the team, we are currently seeking a

Study Director / Assistant Study Director

for Pollinator & Ecotox residue studies (m, f, d)

- full-time, starting 01 Feb 2020

Your Role and Responsibilities

- Planning, conducting and reporting of semi-field and field studies with honey bees/pollinators (e.g. OECD 75, EPPO 170, Residues) and beyond
- Assisting in developing new strategies and test designs in line with current EU guidelines
- Potentially supporting conducting and reporting ecotox residue studies (vegetation, arthropods etc)

Your Profile and Qualifications

- University degree in a relevant science (e.g. biology, agriculture, environmental sciences or a related field)
- Relevant working experience of at least 3 years (with honey bees or other pollinators)
- Highly self-motivated with excellent communication skills; ability to work in a team
- Ability to solve problems and to structure and simplify complex tasks
- High degree of flexibility
- Excellent English language skills (spoken and written); German language skills would be an asset, but not mandatory

Your Benefits

- You will be working in a dynamic and experienced international team of scientists in an EU-wide operating consultant company, with a high degree of responsibility and independence
- You will be able to benefit from our team based approach, which will allow you to be part of projects beyond the standard studies
- We have a pension plan; we sponsor environment-friendly (public) transport

Location

- The office is located in Leverkusen (Germany), close to the vibrant cities of Cologne and Duesseldorf and within short distance to the Bergisches Land or the Eifel. Great places for nature walks, cycling routes etc.
- Do you like to join our team? Please send your application to the following address: "info@tier3.de" ref. 'bee studies'
